LIVING SYMPHONIES  
Saturday 28th September 2013

TODAY'S OPENING TIMES  
10am-4pm

To visit the installation, just follow the Living Symphonies signs, or ask nearby Forestry Commission representatives for directions to the nature trail.

Living Symphonies is a sound installation that grows in the same way as a forest ecosystem, portraying the second-by-second activity of Thetford forest's wildlife, plants and atmospheric conditions.

A never-ending symphony of sound unfolds in real-time amongst the canopy, trees and undergrowth.
