PATTERN #2

CYCLING SEMI-SKIRT

DESIGN FEATURES

This A-line skirt features a decorative lower flounce with a concealed cord threaded through a series of rings. To convert the skirt, the wearer lifts the hem to the waist, creating a semi-skirt, and uses the cord to secure the material. The fullness of the skirt is tucked away, thus eliminating the danger of material getting caught in the moving wheels. The lower flounce, when made from similar material to the jacket, creates a stylish double peplum.

THE INVENTOR: MADAME JULIA GILL

MADAME JULIA GILL, Court Dressmaker, 56 Haverstock Hill, N.W. lodged her patent for ‘A Cycling Costume for Ladies’ on 16th February 1895. Court Dressmakers were hard working, often independent small business owners. Middle and upperclass women would commission them to make their new wardrobe for major events such as the London Season - an annual period spanning Dec to June when people flocked to the city for political, social and cultural activities.

Cycling was the ‘new cult’ in the mid 1890s and many middle and upperclass women with the resources for leisure time, a new bicycle and specialised costumes drew reference from an abundance of new media and ideas flowing into Victorian society - from local cycling periodicals to colour fashion plates from Paris and exotic tales from foreign travellers. These new cyclists were willing to defy public opinion and push at the edges of social convention, even when it resulted in verbal and even physical assault as parts of society struggled with new forms of female independence.

Small business owners like Julia furnished women not only with brand new cycling costumes, but also with new ideas and imaginaries of being in and moving through public space. Convertible costumes like this cycling semi-skirt enabled wearers to occupy multiple modal identities - giving women choice and control over when and where they cycled and tools to minimise the potential for harassment in public. These kinds of garments materially intervened in discussions about women’s engagement and rights in public space, both for newly independent mobile citizens and also for women as business owners carving out space for their cutting-edge designs in a rapidly expanding retail sector.
Victorians enthusiastically took to the bicycle. Yet women had to deal with many social, political and material challenges to their freedom of movement. Cycling in ‘ordinary’ dress could be dangerous as it wrapped around pedals and caught in wheels. Wearing more ‘rational’ cycle wear, such as shorter skirts and bloomers, was more comfortable, but not necessarily safer as some parts of society were threatened by the sight of this progressive ‘New Woman’ carving new modes of gendered independence in public space. Onlookers sometimes hurled abuse and stones! However, nothing was going to stop women from cycling. In response, some creatively protested against restrictive ideas of how a woman should act and move in public through their clothing, by designing convertible costumes that enabled wearers to switch from street wear to cycle wear when needed. Luckily for us, these inventive women not only imagined, made and wore radical new forms of cycle wear - they also patented their designs!

Six sewing patterns in this collection (comprising a total of nine different garments) are inspired by convertible cycle wear patents lodged in the 1890s by inventive British women. They form part of an ESRC funded Bikes & Bloomers sociology project led by Dr Kat Jungnickel at Goldsmiths, University of London, with Rachel Pimm, Nadia Constaninou, Alice Angus and Britt Hatzius. More about the lives of these fascinating inventors is in Bikes & Bloomers: Victorian Women Inventors and Their Extraordinary Cycle Wear (Goldsmiths Press). Along with the book, these patterns bring to life some of the inspiring cycling, sewing and suffrage stories that have helped shape how we cycle today. They also (still) provide useful ideas for functional clothing that works on and off the bike. We look forward to seeing what modern sewing cyclists make with them.
Pattern #2 is an A-line skirt with decorative flounce that conceals a cord threaded through a series of rings. To convert the skirt, the wearer lifts the hem to the waist, creating a semi-skirt, and uses the cord to gather and tie the material. The lower flounce, when made from similar material to the jacket, creates a stylish double peplum. Requirements: 2m skirt fabric, 1m contrasting fabric, 1.5m cord, 15 curtain rings and 4 buttons.

This pattern is approx UK size 12 and will need to be customised to fit as required. Minimal instructions are provided. See our mistakes, workarounds and suggestions at: bikesandbloomers.com
