

Red  Ribbon
Living Well

Collaboration

Jorella Andrews,
Department of
Visual Cultures

the Book

also the book
1987, 15 1/2 x 23 in.

I use to be creative
when I was young
1994 So it brought
the memories back
to when I was young

I learnt from Joyce
So when I went
home I said I need
to try better

I got inspired

I loved that by the second
and third week people
were really creative

3.15 Event Closes with a Candle Lighting Ceremony

Banners and art works created by Red Ribbon Living Well Group members will also be on show.

Celebrating

Red Ribbon Living Well
December 2021 – December 2022

Information and Advice about Testing

“Better off Knowing”

HIV testing in the UK is free, voluntary and confidential. You can be tested at a sexual health clinic, a GP surgery, A&E, a community testing project or at home using a self-test. Having an HIV test is the only way to know for sure whether you have HIV or you don't.

The sooner you know you have HIV the sooner you can get the medical care you need. This will give you the best chance of getting the treatment and care you need to stay well.

U=U means "Undetectable and Untransmittable"

This means that when a person living with HIV is on regular treatment that lowers the amount of virus in their body to undetectable levels, there is zero risk of passing on HIV to their partners. The low level of virus is described as an undetectable viral load.

People who are taking HIV treatment and have an undetectable viral load do not pass HIV on to their sexual partners. The U=U campaign is supported by the British HIV Association (BHIVA), which is the professional association for doctors and other healthcare professionals working in HIV in the UK.

What is PrEP?

PrEP is Pre-Exposure Prophylaxis. It is a once-daily pill regimen that can help you stay HIV-negative. It is an approved prescription medication.

Pre-exposure prophylaxis (PrEP) is a form of HIV prevention that uses anti-HIV drugs to protect HIV-negative people from acquiring HIV

PrEP is highly effective for preventing HIV. PrEP reduces the risk of getting HIV from sex by about 99% when taken as prescribed.

Addressing stigma and health inequalities

Stigma and health inequalities create significant barriers to accessing testing, prevention, and care for BAME communities.

All national and local HIV treatment and prevention initiatives should explicitly plan and evaluate how they will address HIV-related stigma, discrimination and health inequalities. Stigma isn't something that's new and it isn't something that's going to go away overnight.

Alongside this, we must increase the knowledge and awareness of HIV amongst the general healthcare workforce and service providers e.g., Housing, Jobcentre, Citizen Advice and all government bodies.

“... we were like a nest ...
ourselves ... but when we
started working with
Goldsmiths we started
coming out, slowly by slowly
by slowly”

Husseina Hamza, 8 August 2023.

“The way in which the world is imagined determines at any particular moment what people will do.”

Walter Lippmann, Chapter 1: The World Outside and the Pictures in Our Heads, *Public Opinion*, 1922.
