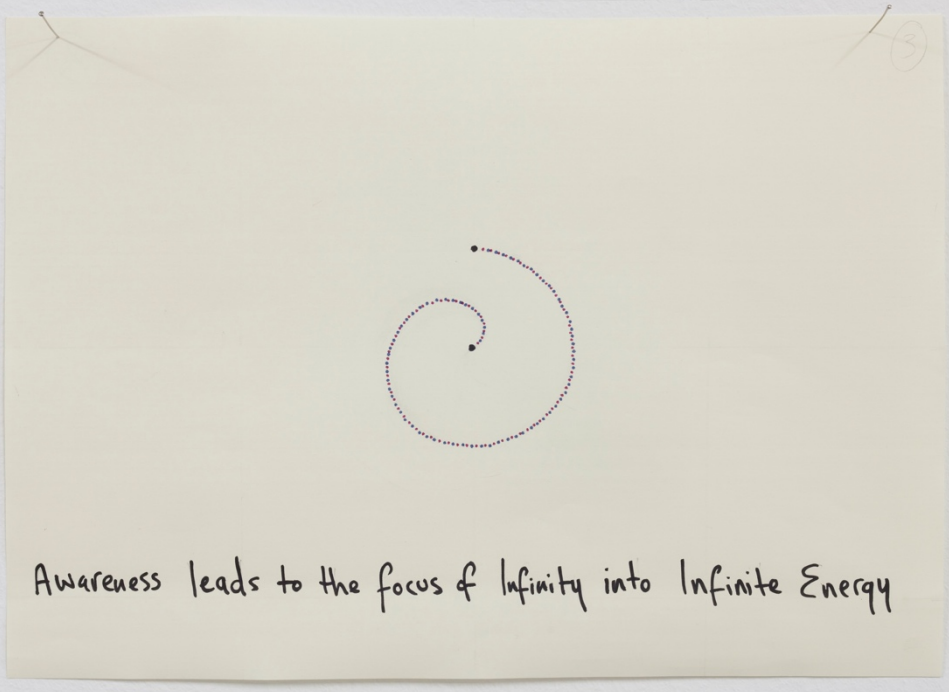
1

First there is Infinity. Infinity is Creation

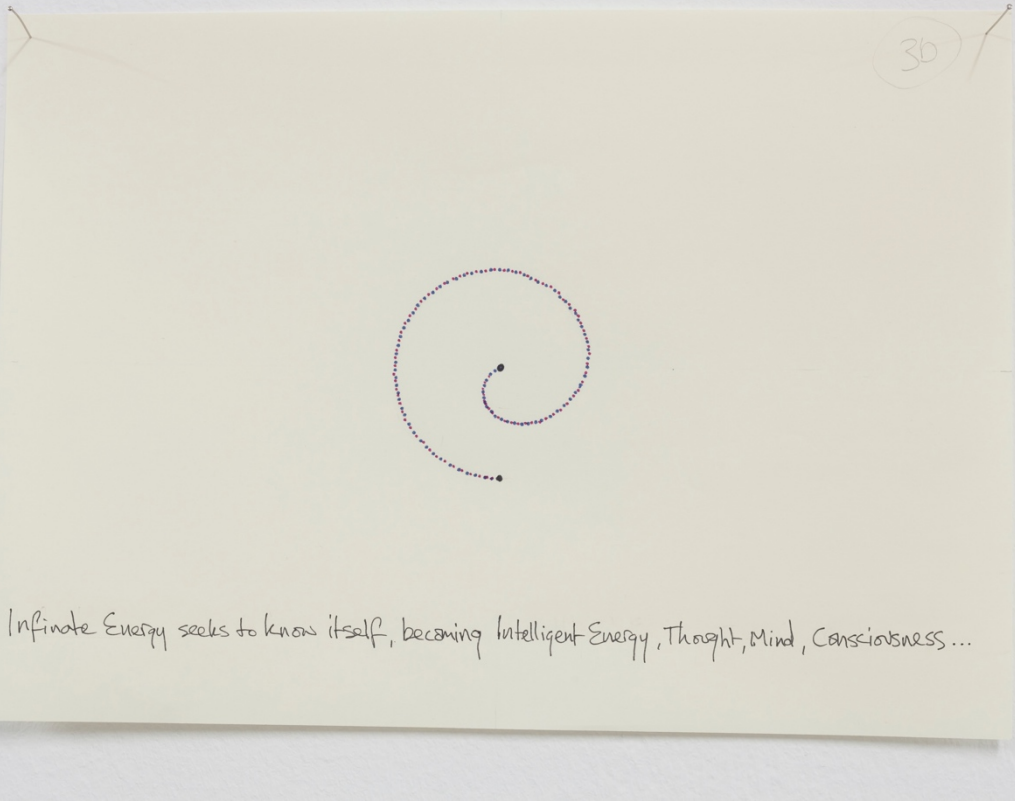
2

.

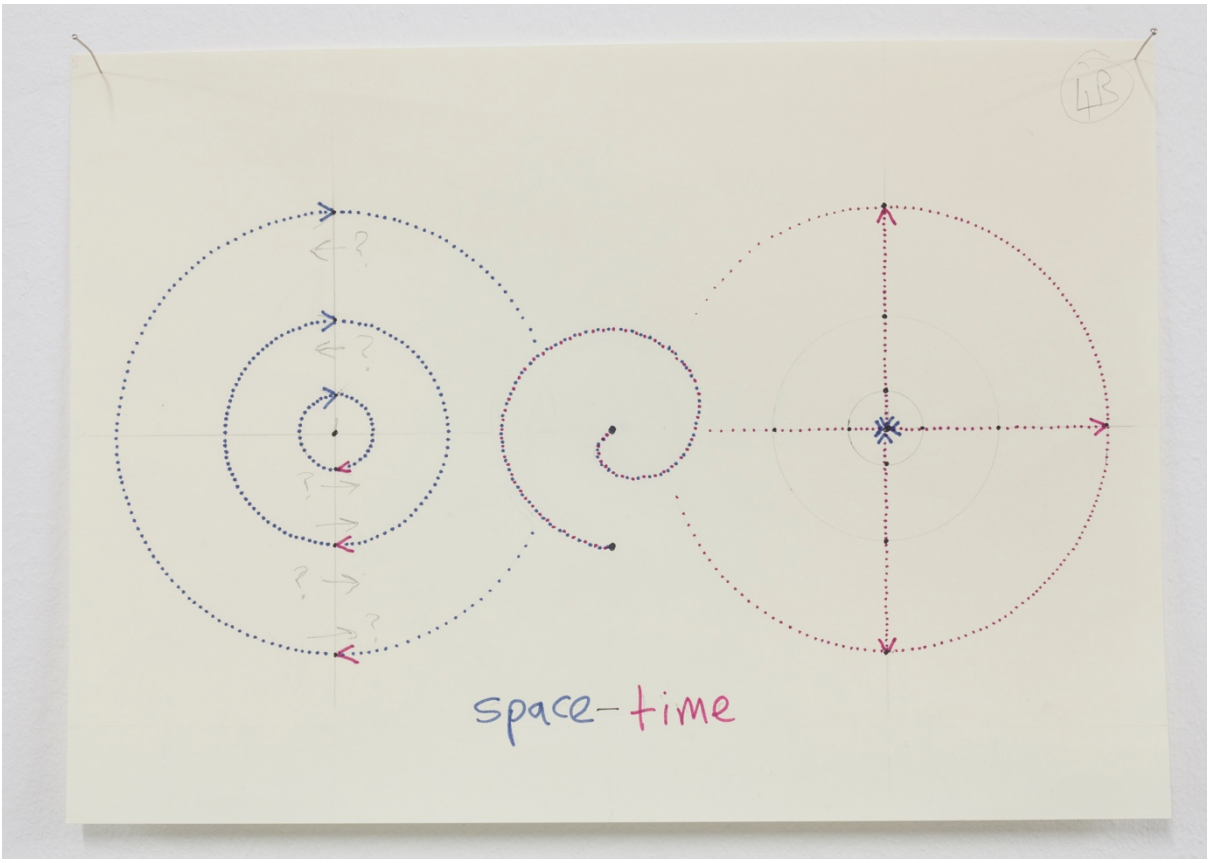
Infinity becomes aware



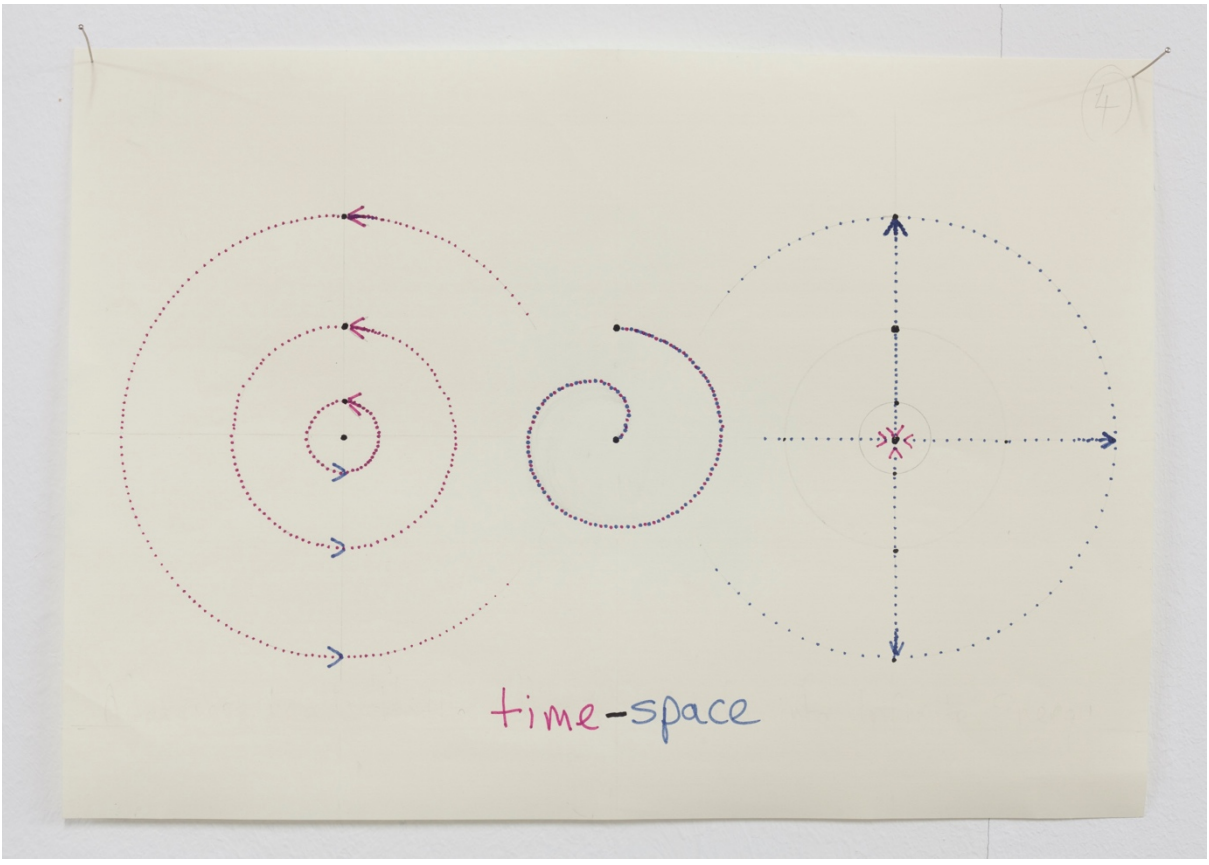
Awareness leads to the focus of Infinity into Infinite Energy



Infinate Energy seeks to know itself, becoming Intelligent Energy, Thought, Mind, Consciousness...



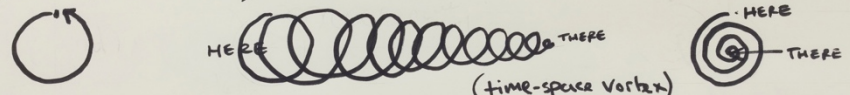
4B
space-time



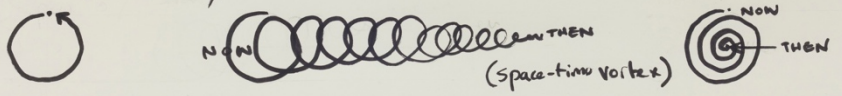
4
time-space

Still point of awareness

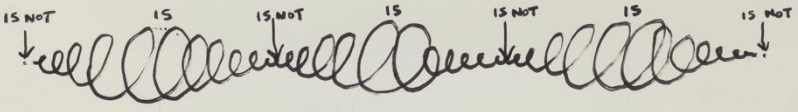
POINT ROTATING IN TIME / OVER SPACE



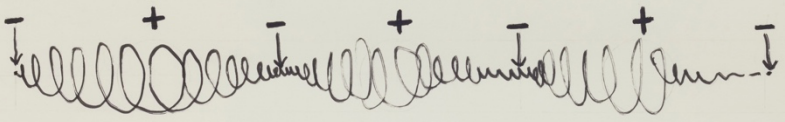
POINT ROTATING IN SPACE / OVER TIME



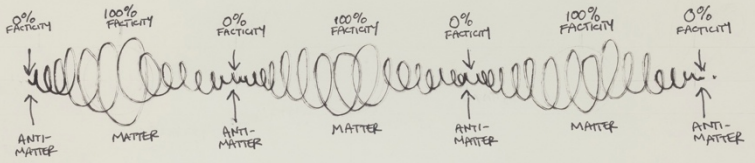
All is motion



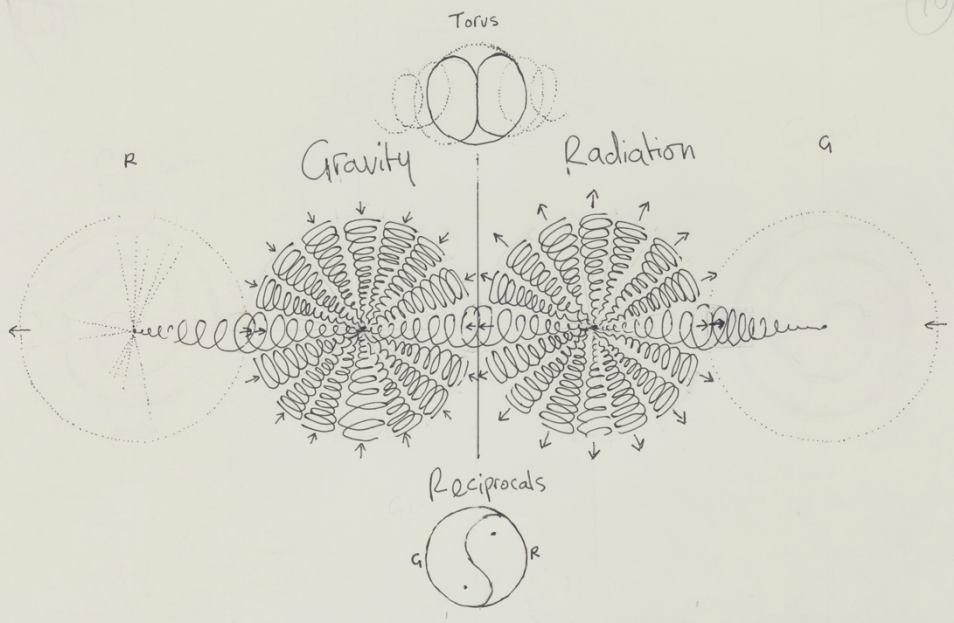
Motion is the vortexing of probability/possibility



Energy is waves of probability-vortices spiralling into and out of existance

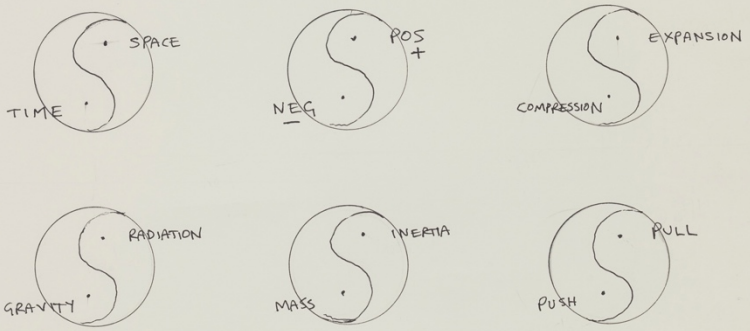


All matter is energy vibrating at specific frequencies. (Periodicity, CPS, Hz)



11

Torus, Torque, Torsion-reciprocity



(Reciprocal conditions)

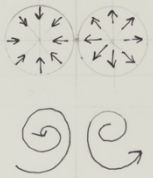
12

Gravity

The positive electric condition compresses large volumes of light-waves by winding them up centripetally

into spiral vortices by thrusting inward from without.

\+ −



Radiation

The negative electric condition expands small volumes of lightwaves by unwinding them centrifugally

into voiding equators where matter disappears

The light of suns and the dark of space are but two opposite conditions (reciprocals) of the same thing. They interchange constantly. Each becomes the other sequentially

13

"Electricity is the only principle which (Source) makes use of to create the universe. And the only two "tools" made use of for creating the universe of matter and motion are two pairs of opposed spiral vortices. One of these opposite pairs meets at apices at wave amplitudes to create spheres of matter and the other opposed pair meets at cone bases upon wave axes to void both matter and motion."
