

Improvisation and future directions for AI and Music

Professor Matthew Yee-King
Goldsmiths

Objectives

- To show examples of AI/ music work
- To discuss technical aspects of the work
- To discuss how that work supports human creativity

“The need to work as though decisions were scarce-as though you had to limit yourself to one idea-is no longer pressing. It’s a change from the influences of scarcity or economy to the influences of abundance and-I’d be willing to say-waste.” - John Cage, 1968

“Future shock is the shattering stress and disorientation that we induce in individuals by subjecting them to too much change in too short a time.” – Alvin Toffler, 1970

“the trouble taken by the composer with series and their permutations has been in vain; in the end it is the statistical distribution that determines the composition” - Gottfried Michael Koenig, 1971

“You should never be comfortable, man. Being comfortable fouled up a lot of musicians” – Miles Davis

Improvisation with Ais: a relic

2011:
Finn Peters alto
flute

Livecoding
improviser
software in
SuperCollider

Filmed by Dom Mino

```
SynthDef("c", {arg f;  
  var c, e;  
  e = Line.kr(0.1, 0, 0.25, doneAction:2);  
  c = SinOsc.ar([f, f*1.5]);  
  Out.ar([0, 1], c * e);  
}).send(s);
```

```
SynthDef("b", {arg f;  
  var c, e;  
  e = Line.kr(0.1, 0, 0.25, doneAction:2);  
  c = PMOsc.ar(f, f/2, Rand(2, 6));  
  Out.ar([0, 1], c * e);  
}).send(s);
```

```
a MykClock
```

```
a MykClock
```

```
localhost [127.0.0.1] 6.118.1 1 ut: 2/ ar 3 dt: 16
```

Conclusion

- I am an optimist!
- Technically challenging work == good!
- But: based around extending and transforming the practice of professional players

Thanks for listening
